

3200 Thermal Method

Great Lengths USA Three-Day Intensive Certification

Cost including application equipment: \$2,400.00

In addition to the two day certification, Great Lengths USA also offers a three-day intensive certification class once a month. This three-day class includes the basic 3200 Thermal Method Two-Day Hands-On Certification Training, plus a third day which focuses on hands-on, in-depth color placement, placement patterns and Great Lengths soft cutting techniques. The Three-Day Intensive Certification will teach you the expert's way of perfecting a Great Lengths application for optimum results, giving you a fast track start and the confidence to deliver the famed Great Lengths result every time.

Also included in the third day is an overview of the Great Lengths advanced application methods*, including the Great Lengths Ultra Sonic 5000 method and the Great Lengths Multi Strand Hair Transfer method*.

As an added value, if you choose to upgrade within 12 months of this certification to the Great Lengths Ultra Sonic 5000 Method or the Great Lengths Multi Strand Hair Transfer Method the additional \$600.00 investment for the Three-Day Intensive Certification will credit toward your advanced method certification training. Please contact a Great Lengths Salon Service Representative on 800-999-0809 for details.

Enrollment in the Three-Day Intensive Certification is extremely limited. Early registration is encouraged.

* The advanced application methods introduction is a demonstration only and does not train or certify the class attendee in the use of Great Lengths advanced methods.

* The Great Lengths Multi Strand Hair Transfer method will not be available in the USA until mid year 2007
